CONTENTS OF VOLUME 264

No. 1 *January* 1977

PAGE

Inhibition of spinocervical tract discharges from localized areas of the sensorimotor cortex in the cat. By A. G. Brown, J. D. Coulter, P. K. Rose, A. D. Short and P. J. Snow . . . 1

A study of the ion selectivity and the kinetic properties of the calcium dependent slow inward current in mammalian cardiac muscle. By H. Reuter and H. Scholz 17

The regulation of the calcium conductance of cardiac muscle by adrenaline. By H. Reuter and H. Scholz 49

An estimate of the secondary spindle receptor afferent contribution to the stretch reflex in extensor muscles of the decerebrate cat. By K. Kanda and W. Z. Rymer 63

A quantitative analysis of local anaesthetic alteration of miniature end-plate currents and end-plate current fluctuations. By R. L. Ruff 89

Calcium absorption in diphosphonate-treated rats: effect of parathyroid function, dietary calcium and phosphorus. By J.-P. Bonjour, H. Fleisch and U. Trechsel 125

A large birefringence signal preceding contraction in single twitch fibres of the frog. By S. M. Baylor and H. Oetliker . 141

The optical properties of birefringence signals from single muscle fibres. By S. M. Baylor and H. Oetliker . . . 163

Birefringence signals from surface and T-system membranes of frog single muscle fibres. By S. M. Baylor and H. Oetliker . 199

Acid and pepsin secretion of separated gastric pouches during perfusion of antral pouches with cholinergic stimulating and blocking agents and lignocaine. By L. M. McLeay and D. A. Titchen 215

Drinking caused by exposing dogs to radiant heat. By W. J. O'Connor 229

The effect of lowering external sodium on the intracellular sodium activity of crab muscle fibres. By R. D. Vaughan-Jones . 239

The influence of immobilization and stretch on protein turnover of rat skeletal muscle. By David F. Goldspink 267

PAGE

The influence of activity on muscle size and protein turnover. By DAVID F. GOLDSPINK 283

Quantitative evaluation of the loss of human-platelet dense bodies following stimulation by thrombin or A23187. By J. L. COSTA, T. C. DETWILER, R. D. FEINMAN, D. L. MURPHY, C. S. PATLAK and K. D. PETTIGREW 297

No. 2 *January* 1977

The influence of the lymph node on the protein concentration of efferent lymph leaving the node. By J. W. QUIN and A. D. SHANNON 307

Effects of the calcium ionophore A23187 on pancreatic acinar cell membrane potentials and amylase release. By JOERGEN HEDEMARK POULSEN and JOHN A. WILLIAMS 323

The actions of ouabain on intercellular coupling and conduction velocity in mammalian ventricular muscle. By ROBERT WEINGART 341

Dual effects of hemicholinium-3 at central cholinergic synapses. By C. R. CRAIG, D. R. CURTIS and D. LODGE 367

Induction of compression in the re-established visual projections on to a rotated tectal reimplant that retains its original topographic polarity within the halved optic tectum of adult goldfish. By MYONG G. YOON 379

The alteration by ouabain of calcium movements in human red cell ghosts. By MARIA ISERN and PEDRO J. ROMERO 411

The effects of bilateral adrenalectomy or hypophysectomy of the foetal lamb *in utero*. By R. J. BARNES, R. S. COMLINE and MARIAN SILVER 429

Kinetics of the inhibition of the Na–K pump by external sodium. By JOHN R. SACHS 449

Kinetics of the inhibition of the Na–K pump by tetrapropylammonium chloride. By DONNA L. KROPP and JOHN R. SACHS . 471

The effect of preganglionic nerve stimulation on the accumulation of certain analogues of choline by a sympathetic ganglion. By B. COLLIER and D. ILSON 489

The effect of ambient temperature upon the secretion of thyroxine in the young pig. By S. E. EVANS and D. L. INGRAM 511

PAGE

The hepatocellular uptake of glucose, galactose and fructose in conscious sheep. By R. H. Hooper and A. H. Short . . . 523

Influence of medial preoptic anterior hypothalamic area stimulation on the excitability of mediobasal hypothalamic neurones in the rat. By L. P. Renaud 541

Specific innervation of guinea-pig superior cervical ganglion cells by preganglionic fibres arising from different levels of the spinal cord. By Arild Njå and Dale Purves 565

Interaction of air temperature and core temperatures in thermoregulation of the goat. By Claus Jessen 585

Innervation of the rabbit rectococcygeus muscle and the functional relationship of the muscle to the terminal large intestine. By B. F. King, H. C. McKirdy and San San Wai . . . 607

No. 3 *January* 1977

Anomalies of disparity detection in the human visual system. By Ronald Jones 621

Responses of intradental nerves to electrical and thermal stimulation of teeth in dogs. By B. Matthews 641

Effect of 13-nle-motilin on gastric secretion, serum gastrin level and mucosal blood flow in dogs. By S. J. Konturek, A. Dembinski, R. Krol and E. Wünsch 665

Ballistic contractions in man: characteristic recruitment pattern of single motor units of the tibialis anterior muscle. By John E. Desmedt and Emile Godaux 673

A quantitative study of the mechanosensory innervation of the salamander skin. By E. Cooper and J. Diamond 695

The effects of nerve section and of colchicine treatment on the density of mechanosensory nerve endings in salamander skin. By E. Cooper, J. Diamond and C. Turner 725

The transfer of free fatty acids across the rabbit placenta. By M. C. Elphick and D. Hull 751

Regenerative amacrine cell depolarization and formation of on-off ganglion cell response. By Frank S. Werblin . . . 767

PAGE

Differentiation between the calcium-dependent effects of cholecystokinin-pancreozymin and the bicarbonate-dependent effects of secretin in exocrine secretion of the rat pancreas. By T. KANNO and M. YAMAMOTO 787

Identification of amacrine and ganglion cells in the carp retina. By MOTOHIKO MURAKAMI and YUKIO SHIMODA 801

Secretion of fluid and amylase in the perfused rat pancreas. By O. H. PETERSEN and N. UEDA 819

The effect of sodium-free and potassium-free solutions, ionic current inhibitors and ouabain on electrophysiological properties of smooth muscle of guinea-pig ureter. By M. F. SHUBA 837

The mechanism of the excitatory action of catecholamines and histamine on the smooth muscle of guinea-pig ureter. By M. F. SHUBA 853

Firing rate and recruitment order of toe extensor motor units in different modes of voluntary contraction. By LENNART GRIMBY and JAN HANNERZ 865

Frog muscle spindles with unbranched myelinated afferent axons: the response to stretch and the length of the first myelinated segment. By F. ITO and Y. KOMATSU 881

Voltage-clamp analysis of a self-inhibitory synaptic potential in the buccal ganglia of *Aplysia*. By DANIEL GARDNER 893

CONTENTS OF VOLUME 265

No. 1 *February* 1977

PAGE

Tension in mechanically disrupted mammalian cardiac cells: effects of magnesium adenosine triphosphate. By P. M. Best, Sue K. Bolitho Donaldson and W. G. L. Kerrick 1

The effect of insulin on the transport of sodium and potassium in rat soleus muscle. By Torben Clausen and Peter George Kohn 19

Microcalorimetric determination of energy expenditure due to active sodium-potassium transport in the soleus muscle and brown adipose tissue of the rat. By A. Chinet, Torben Clausen and L. Girardier 43

The production of denervation-like changes in rat muscle by colchicine, without interference with axonal transport or muscle activity. By A. Cangiano and J. A. Fried 63

Effects of applied currents on turtle cones in darkness and during the photoresponse. By A. L. Byzov and L. Cervetto . 85

Effects of cytochalasin B and dimethylsulphoxide on isosmotic fluid transport by rabbit gall-bladder *in vitro*. By O. Frederiksen and P. P. Leyssac 103

Rat adrenocortical dynamics. By Evangelos Papaikonomou . 119

Control of dynamic and static nuclear bag fibres and nuclear chain fibres by gamma and beta axons in isolated cat muscle spindles. By I. A. Boyd, Margaret H. Gladden, P. N. McWilliam and J. Ward 133

The orderly recruitment of motor units of the masseter and temporal muscles during voluntary isometric contraction in man. By R. Yemm 163

Reaction of 'intact' spinal motoneurones to partial denervation of the muscle. By P. Huizar, N. Kudo, M. Kuno and Y. Miyata. 175

Reduction of potassium permeability by chloride substitution in cardiac cells. By E. Carmeliet and F. Verdonck . . . 193

PAGE

The electrical properties and active ion transport across the urinary bladder of the urodele, *Amphiuma means*. By KEVIN J. DEGNAN and JOSE A. ZADUNAISKY 207

Metabolic energy dependence of glucose, water and sodium absorption in the presence and absence of 'downhill' sodium gradients across isolated rat small intestine. By M. L. G. GARDNER. 231

Comparison of the critical periods for monocular and directional deprivation in cats. By NANCY BERMAN and N. W. DAW . . 249

No. 2 *February* 1977

The formation and regression of synapses during the re-innervation of axolotl striated muscles. By M. R. BENNETT and JULIA RAFTOS 261

The release of vasopressin by nicotine: further studies on its site of action. By ELIZABETH M. CASTRO DE SOUZA and M. ROCHA E SILVA JR. 297

Control of hepatic and intestinal blood flow: effect of isovolaemic haemodilution on blood flow and oxygen uptake in the intact liver and intestines. By W. WAYNE LAUTT 313

Excitatory responses of neurones in rat bulbar reticular formation to bulbar Raphe stimulation and to iontophoretically applied 5-hydroxytryptamine, and their blockade by LSD 25. By I. BRIGGS 327

Axon-collateral activation by dorsal spinocerebellar tract fibres of group I relay cells of nucleus Z in the cat medulla oblongata. By H. JOHANSSON and H. SILFVENIUS 341

Input from ipsilateral proprio- and exteroceptive hind limb afferents to nucleus Z of the cat medulla oblongata. By H. JOHANSSON and H. SILFVENIUS 371

Connexions from large, ipsilateral hind limb muscle and skin afferents to the rostral main cuneate nucleus and to the nucleus X region in the cat. By H. JOHANSSON and H. SILFVENIUS . . 395

Fractionation studies on the absorption of labelled immunoglobulin G by the gut of young rats. By B. MORRIS and R. MORRIS. 429

Cellular and extracellular dehydration, and angiotensin as stimuli to drinking in the common iguana *Iguana iguana*. By J. T. FITZSIMMONS and SUSAN KAUFMAN 443

Three pharmacologically distinct potassium channels in molluscan neurones. By STUART H. THOMPSON 465

Renin release and autoregulation of blood flow in a new model of non-filtering non-transporting kidney. By JANUSZ SADOWSKI and BOŻENA WOCIAL 219

Ouabain-sensitive ion fluxes in the smooth muscle of the guinea-pig's taenia coli. By J. H. WIDDICOMBE 235

The use of lanthanum to estimate the numbers of extracellular ion-exchanging sites in the guinea-pig's taenia coli, and its effects on transmembrane monovalent ion movements. By A. F. BRADING and J. H. WIDDICOMBE 255

Correlative physiological and morphological studies of rapidly adapting mechanoreceptors in cat's glabrous skin. By A. IGGO and H. OGAWA 275

The influence of sodium on calcium movements and catecholamine release in thin slices of bovine adrenal medulla. By T. J. RINK . 297

Metiamide and stimulated acid secretion from the isolated non-distended and distended mouse stomach. By BEATRICE Y. C. WAN. 327

The influence of the autonomic nervous sytem in the control of erythropoietin secretion in the hypoxic rat. By GARETH BEYNON . 347

An analysis of the action of a false transmitter at the neuro-muscular junction. By D. COLQUHOUN, W. A. LARGE and H. P. RANG 361

Intracerebroventricular taurine in rabbits: effects on normal body temperature, endotoxin fever and hyperthermia produced by PGE_1 and amphetamine. By W. S. HARRIS and J. M. LIPTON . 397

Very small, very short-latency changes in human breathing induced by step changes of alveolar gas composition. By D. J. C. CUNNINGHAM, D. B. DRYSDALE, W. N. GARDNER, J. I. JENSEN, E. STRANGE PETERSEN and B. J. WHIPP 411

A dissociation between temperature regulation and fever in the rabbit. By D. BORSOOK, HELEN P. LABURN, C. ROSENDORFF, G. H. WILLIES and C. J. WOOLF 423

Facilitation of transmitter secretion from toad motor nerve terminals during brief trains of action potentials. By RON J. BALNAVE and PETER W. GAGE 435

Body fluid changes which influence drinking in the water deprived rat. By D. J. RAMSAY, BARBARA J. ROLLS and R. J. WOOD 453

PAGE

Eye- and head movements in freely moving rabbits. By H. COLLEWIJN 471

The changes in configuration of the rib cage and abdomen during breathing in the anaesthetized cat. By K. M. C. DA SILVA, B. McA. SAYERS, T. A. SEARS and D. T. STAGG 499

No. 3 *April* 1977

Microiontophoretic studies of the effects of cyclic nucleotides on excitability of neurones in the rat cerebral cortex. By T. W. STONE and D. A. TAYLOR 523

The concentration of ionized magnesium in barnacle muscle fibres. By F. J. BRINLEY JR., A. SCARPA and TERESA TIFFERT . 545

Effects of steady-state plasma vasopressin levels on the distribution of intrarenal blood flow on electrolyte excretion. By N. AKATSUKA, W. H. MORAN, MARY L. MORGAN and M. F. WILSON. 567

Relative capabilities of sarcoplasmic reticulum in fast and slow mammalian skeletal muscles. By F. N. BRIGGS, J. L. POLAND and R. J. SOLARO 587

Cone pigments in human deutan colour vision defects. By M. ALPERN and T. WAKE 595

Variation in the action spectrum of erythrolabe among deuteranopes. By M. ALPERN and E. N. PUGH JR. 613

The red and green cone visual pigments of deuteranomalous trichromacy. By M. ALPERN and J. MOELLER 647

A-band length, striation spacing and tension change on stretch of active muscle. By LYDIA HILL 677

The passive electrical properties of frog skeletal muscle fibres at different sarcomere lengths. By ANGELA F. DULHUNTY and CLARA FRANZINI-ARMSTRONG 687

Types of intra- and extrafusal muscle fibre innervated by dynamic skeleto-fusimotor axons in cat peroneus brevis and tenuissimus muscles, as determined by the glycogen-depletion method. By D. BARKER, FRANCOISE EMONET-DÉNAND, D. W. HARKER, LÉNA JAMI and Y. LAPORTE 713

Separate pathways for urea and water, and for chloride in chicken erythrocytes. By JESPER BRAHM and JENS OTTO WIETH . . 727

CONTENTS OF VOLUME 267

No. 1 *May* 1977

PAGE

Testicular blood flow and a study of the testicular venous to arterial transfer of radioactive krypton and testosterone in the rhesus monkey. By N. EINER-JENSEN and G. M. H. WAITES . . 1

Electrical responses of rods in the retina of *Bufo marinus*. By L. CERVETTO, E. PASINO and V. TORRE 17

Skin temperature during running – a study using infrared colour thermography. By R. P. CLARK, B. J. MULLIN and L. G. C. E. PUGH 53

Reduction of the duration of isovolumic relaxation in the ejecting left ventricle of the dog: residual volume clamping. By HIROYUKI SUGA and KEN-ICHI YAMAKOSHI 63

Nervous outflow from skeletal muscle following chemical noxious stimulation. By S. MENSE 75

Electrophysiological study of the antiluminal membrane in the proximal tubule of *Necturus*: effect of inorganic anions and SCN^-. By TAKIS ANAGNOSTOPOULOS 89

Effects of replacing medium sodium by choline, caesium, or rubidium, on water and ion contents of renal cortical slices. By PAULINE M. HUGHES and ANTHONY D. C. MACKNIGHT . . 113

Current-voltage curve of sodium channels and concentration dependence of sodium permeability in frog skin. By W. FUCHS, E. HVIID LARSEN and B. LINDEMANN 137

Effects of sodium, potassium and calcium ions on the slow wave in the circular muscle of the guinea-pig stomach. By M. OHBA, Y. SAKAMOTO and T. TOMITA 167

The effect of anaesthesia on the inhibition of pentagastrin-evoked gastric acid secretion induced by atropine in the rat. By A. R. HEDGES and M. E. PARSONS 181

The distribution of α-bungarotoxin binding sites on mammalian skeletal muscle developing *in vivo*. By STUART BEVAN and JOE HENRY STEINBACH 195

Sensory fibres in ventral roots L7 and S1 in the cat. By RICHARD E. COGGESHALL and HARUHIDE ITO 215

PAGE

Sucrose absorption by the rat small intestine *in vivo* and *in vitro*. By RUTH E. DAVIDSON and H. J. LEESE 237

Chemical energetics in repeated contractions of frog sartorius muscles at 0° C. By M. J. KUSHMERICK and R. J. PAUL. . . 249

No. 2 *May* 1977

Termination of transmitter release by stimulation of sodium-potassium activated ATPase. By E. S. VIZI 261

The action potential of chick dorsal root ganglion neurones maintained in cell culture. By MARC A. DICHTER and GERALD D. FISCHBACH 281

Detection of light-induced changes of intracellular ionized calcium concentration in *Limulus* ventral photoreceptors using arsenazo III. By J. E. BROWN, P. K. BROWN and L. H. PINTO . 299

On the question of body volume or sodium status influencing renin release. By J. R. BLAIR-WEST, A. H. BROOK and PAMELA A. SIMPSON 321

The pupillary, the intraocular pressure and the vasomotor responses to noradrenaline in rabbits. By MAURICE E. LANGHAM and KAREN PALEWICZ 339

The functional significance of sodium channels in pancreatic beta-cell membranes. By P. DONATSCH, D. A. LOWE, B. P. RICHARDSON and PAMELA TAYLOR 357

Inactivation of the asymmetrical displacement current in giant axons of *Loligo forbesi*. By H. MEVES and W. VOGEL 377

Slow recovery of sodium current and 'gating current' from inactivation. By H. MEVES and W. VOGEL 395

Regulation of cerebrospinal fluid bicarbonate by the cat choroid plexus. By RUSSELL F. HUSTED and DONAL J. REED . . . 411

Surface potential reflected in both gating and permeation mechanisms of sodium and calcium channels of the tunicate egg cell membrane. By HARUNORI OHMORI and MITSUNOBI YOSHII . . 429

Ionic currents through the membrane of the mammalian oocyte and their comparison with those in the tunicate and sea urchin. By HARUMASA OKAMOTO, KUNITARO TAKAHASHI and NAOHIDE YAMASHITA 465

PAGE

The effects of strontium and barium ions at synapses in sympathetic ganglia. By ELSPETH M. MCLACHLAN 497

Kinetic analysis and partitioning of sodium and chloride influxes across the gills of sea water adapted trout. By J-P. GIRARD and P. PAYAN 519

Responses of spinocervical tract neurones to noxious stimulation of the skin. By F. CERVERO, A. IGGO and V. MOLONY 537

Effects of prostaglandin antagonism on sodium arachidonate fever in rabbits. By HELEN LABURN, D. MITCHELL and C. ROSENDORFF 559

No. 3 *June* 1977

Kinetics of luminal acidification in cortical tubules of the rat kidney. By G. GIEBISCH, G. MALNIC, G. B. DE MELLO and M. DE MELLO AIRES 571

Mechanisms and components of renal tubular acidification. By A. C. CASSOLA, G. GIEBISCH and G. MALNIC 601

Immunoreactive lutenizing hormone releasing factor (LRF) in pituitary stalk plasma from female rats: effects of stimulating diencephalon hippocampus and amygdala. By SHARON A. CHIAPPA, G. FINK and NANCY M. SHERWOOD 625

Some electrophysiological properties of neurones of rat locus coeruleus. By SHOJI NAKAMURA 641

Endogenous pyrogen-like substance produced by reptiles. By HARRY A. BERNHEIM and MATTHEW J. KLUGER 659

Effects of cardiac aglycones on the sodium efflux in barnacle muscle fibres. By E. EDWARD BITTAR and DONNA J. BROWN . 667

A mathematical model for counter-current multiplication in the swim-bladder. By TORBJØRN SUND 679

Gas deposition by counter-current multiplication in the eel swim-bladder: experimental verification of a mathematical model. By JOHAN B. STEEN and TORBJØRN SUND 697

Contraction and recovery of living muscles studied by ^{31}p nuclear magnetic resonance. By M. JOAN DAWSON, D. G. GADIAN and D. R. WILKIE 703

PAGE

Internal recording of the early receptor potential in turtle cones. By A. L. HODGKIN and P. M. O'BRYAN 737

The site and receptors responsible for the inhibition by sympathetic nerves of intestinal smooth muscle and its parasympathetic motor nerves. By J. S. GILLESPIE and M. A. KHOYI . . . 767

Micro-electrode measurement of the intracellular pH and buffering power of mouse soleus muscle fibres. By C. CLAIRE AICKIN and R. C. THOMAS 791

Static and dynamic fusimotor action on the response of IA fibres to low frequency sinusoidal stretching of widely ranging amplitude. By M. HULLIGER, P. B. C. MATTHEWS and J. NOTH . . . 811

Effects of combining static and dynamic fusimotor stimulation on the response of the muscle spindle primary ending to sinusoidal stretching. By M. HULLIGER, P. B. C. MATTHEWS and J. NOTH . 839

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

15 *January* 1977

CONTENTS OF VOLUME 268

No. 1 *June* 1977

PAGE

Spectral and orientation specificity of single cells in foveal striate cortex of the vervet monkey, *Cercopithecus aethiops*. By ALGIS BERTULIS, CHRISTIAN GULD and MARGARET A. LENNOX-BUCHTAL 1

Membrane properties of *Aplysia* neurones intracellularly injected with phospholipases A and C. By D. H. HINZEN and L. TAUC 21

Human erythrocyte anion permeabilities measured under conditions of net charge transfer. By M. J. HUNTER 35

Calcium currents and conductances in the muscle membrane of the crayfish. By M. HENČEK and J. ZACHAR 51

Supporting effects of myoepithelial cells in submandibular glands of dogs when acting against increased intraluminal pressure. By N. EMMELIN, J. R. GARRETT and P. GJÖRSTRUP . . . 73

Maintained function of foreign and appropriate junctions of reinnervated goldfish extraocular muscle. By SHERYL A. SCOTT . 87

The effect of temperature on the potential difference and input resistance of rat seminiferous tubules. By R. T. GLADWELL . . 111

Movements of radioactive potassium in isolated rat ganglia. By C. N. SCHOLFIELD 123

Muscarinic, alpha-adrenergic and peptide receptors regulate the same calcium influx sites in the parotid gland. By JAMES W. PUTNEY JR. 139

Oscillation of the human ankle joint in response to applied sinusoidal torque on the foot. By GYAN C. AGARWAL and GERALD L. GOTTLIEB 151

Reconstruction of the action potential of ventricular myocardial fibres. By G. W. BEELER and H. REUTER 177

Hyperpolarizing effects of dopamine on chemoreceptor nerve endings from cat and rabbit carotid bodies *in vitro*. By S. R. SAMPSON and E. H. VIDRUK 211

Sodium currents in mammalian muscle. By R. H. ADRIAN and M. W. MARSHALL 223

Inhibition of cuneate neurones: its afferent source and influence on dynamically sensitive 'tactile' neurones. By E. BYSTRZYCKA, B. S. NAIL and MARK ROWE 251

No. 2 *June* 1977

PAGE

Relaxation experiments using bath-applied suberyldicholine. By P. R. ADAMS 271

Voltage jump analysis of procaine action at frog end-plate. By P. R. ADAMS 291

Interacting effects of temperature and extracellular calcium on the spontaneous release of transmitter at the frog neuromuscular junction. By C. J. DUNCAN and HELEN E. STATHAM . . . 319

Self-facilitation of ganglion cells in the retina of the turtle. By P. L. MARCHIAFAVA and V. TORRE 335

Short-circuit current and total conductance measurements on rabbit ileum. By C. HENRIQUES DE JESUS 353

Release of adenosine triphosphate from isolated adult heart cells in response to hypoxia. By T. FORRESTER and CAROLE A. WILLIAMS 371

Laminar differences in receptive field properties of cells in cat primary visual cortex. By CHARLES D. GILBERT 391

Ia afferent activity during a variety of voluntary movements in the cat. By A. PROCHAZKA, R. A. WESTERMAN and S. P. ZICCONE 423

Appearance of new acetylcholine receptors on the baby chick biventer cervicis and denervated rat diaphragm muscles after blockade with α-bungarotoxin. By C. CHIUNG CHANG, M. JAI SU and L. HSIEN TUNG 449

Mechanical work and efficiency in level walking and running. By G. A. CAVAGNA and M. KANEKO 467

The effects of breathing of alternate breaths of air and a carbon dioxide rich gas mixture in anaesthetized cats. By C. B. WOLFF . 483

Properties of vestibular neurones projecting to neck segments of the cat spinal cord. By S. RAPOPORT, A. SUSSWEIN, Y. UCHINO and V. J. WILSON 493

The effect of internal and external 4-aminopyridine on the potassium currents in intracellularly perfused squid giant axons. By H. MEVES and Y. PICHON 511

Sensory deprivation during development decreases the responsiveness of cricket giant interneurones. By S. G. MATSUMOTO and R. K. MURPHEY 533

Further observations on an ether-*O*-oxidase, formerly called alkyl etherase from liver tissue. By R. A. PETERS and M. SHORTHOUSE . 549

The gecko visual pigments: a microspectrophotometric study. By FREDERICK CRESCITELLI, H. J. A. DARTNALL and E. R. LOEW 559

No. 3 *July* 1977

PAGE

Regenerative repolarization of the frog ventricular action potential: a time and voltage-dependent phenomenon. By YALE GOLDMAN and MARTIN MORAD 575

Measurement of transmembrane potential and current in cardiac muscle: a new voltage clamp method. By YALE GOLDMAN and MARTIN MORAD 613

Ionic membrane conductance during the time course of the cardiac action potential. By YALE GOLDMAN and MARTIN MORAD . . 655

The synergistic action of L-glutamate and L-aspartate at crustacean excitatory neuromuscular junctions. By A. C. CRAWFORD and R. N. MCBURNEY 697

The termination of transmitter action at the crustacean excitatory neuromuscular junction. By A. C. CRAWFORD and R. N. MCBURNEY 711

Effects of innervation on the distribution of acetylcholine receptors on cultured muscle cells. By M. J. ANDERSON, M. W. COHEN and E. ZORYCHTA 731

Nerve-induced and spontaneous redistribution of acetylcholine receptors on cultured muscle cells. By M. J. ANDERSON and M. W. COHEN 757

The physiologically relevant information regarding systematic blood pressure encoded in the carotid sinus baroreceptor discharge pattern. By J. O. ARNDT, J. MORGENSTERN and L. SAMODELOV . 775

Direct evidence for the location of kallikrein in the striated ducts of the cat's submandibular gland by the use of specific antibody. By Y. HOJIMA, B. MARANDA, C. MORIWAKI and M. SCHACHTER . 793

The physiological rhythms of subjects living on a day of abnormal length. By J. N. MILLS, D. S. MINORS and J. M. WATERHOUSE . 803

On the subdivision of static and dynamic fusimotor actions on the primary ending of the cat muscle spindle. By F. EMONET-DÉNAND, Y. LAPORTE, P. B. C. MATTHEWS and J. PETIT . . 827

CONTENTS OF VOLUME 269

No. 1. *July* 1977

PAGE

In vitro measurement of rate of fluid secretion in rat isolated seminiferous tubules. Effects of metabolic inhibitors and ions. By Y. M. Cheung, J. C. Hwang and P. Y. D. Wong 1

Discrimination between nicotinic receptors in vertebrate ganglia and skeletal muscle by alpha-bungarotoxin and cobra venoms. By Sherry Bursztajn and Michael D. Gershon 17

The effect of training and detraining on muscle composition in the horse. By P. S. Guy and D. H. Snow 33

Effect of anoxia and ATP depletion on the membrane potential and permeability of dog liver. By L. Lambotte 53

Comparison of the effect of somatostatin on gastrointestinal function in the conscious and anaesthetized cat and on the isolated cat pancreas. By M. Albinus, E. L. Blair, R. M. Case, D. H. Coy, A. Gomez-Pan, B. H. Hirst, J. D. Reed, A. V. Schally, B. Shaw, P. A. Smith and J. R. Smy 77

The role of calcium in renin secretion from the isolated perfused cat kidney. By Gayle E. Lester and R. P. Rubin 93

Analysis of atropine action at the frog neuromuscular junction. By Anne Feltz, W. A. Large and A. Trautmann 109

Adrenal and pancreatic endocrine responses to hypoxia and hypercapnia in the calf. By S. R. Bloom, A. V. Edwards and R. N. Hardy 131

Acetylcholine receptor distribution on myotubes in culture correlated to acetylcholine sensitivity. By B. R. Land, T. R. Podleski, E. E. Salpeter and M. M. Salpeter 155

The effects of remote retinal stimulation on the responses of cat retinal ganglion cells. By H. B. Barlow, A. M. Derrington, L. R. Harris and P. Lennie 177

Responses of identified spinal neurones to acetylcholine applied by micro-electrophoresis. By N. R. Myslinski and Mirjana Randic 195

No. 2 *July* 1977

PAGE

Development of neuromuscular transmission in a larval tunicate. By HARUNORI OHMORI and SHIGETO SASAKI 221

The force-velocity relationship in vertebrate muscle fibres at varied tonicity of the extracellular medium. By K. A. P. EDMAN and J. C. HWANG 255

Cone signals in the cat's retina. By CHRISTINA ENROTH-CUGELL, B. GEVENE HERTZ and P. LENNIE 273

Convergence of rod and cone signals in the cat's retina. By CHRISTINA ENROTH-CUGELL, B. GEVENE HERTZ and P. LENNIE . 297

Inhibition of human motoneurones, probably of Renshaw origin, elicited by an orthodromic motor discharge. By B. BUSSEL and E. PIERROT-DESEILLIGNY 319

The binding of labelled saxitoxin to the sodium channels in normal and denervated mammalian muscle, and in amphibian muscle. By J. M. RITCHIE and R. B. ROGART 341

Quantitative assessment of cardiac pump performance. By VERNON S. BISHOP and LAWRENCE D. HORWITZ 355

Calcium movements during the release of catecholamines from the adrenal medulla: effects of methoxyverapamil and external cations. By J. AGUIRRE, J. E. B. PINTO and J. M. TRIFARÓ 371

The effect of prostaglandin synthesis inhibitors on renal blood flow distribution in conscious rabbits. By J. BHATTACHARYA and L. J. BEILIN 395

Thyroid calorigenesis in isolated, perfused rat liver: minor role of active sodium-potassium transport. By MORTEN FOLKE and LEIF SESTOFT 407

Caffeine and the contractility of single muscle fibres from the barnacle *Balanus nubilus*. By C. C. ASHLEY, J. C. ELLORY and P. J. GRIFFITHS 421

Tension responses to sudden length change in stimulated frog muscle fibres near slack length. By L. E. FORD, A. F. HUXLEY and R. M. SIMMONS 441

No. 3. *August* 1977

PAGE

Rod-cone interaction in light adaptation. By M. Latch and P. Lennie 517

Differentiation of electrical and contractile properties of slow and fast muscle fibres. By Tessa Gordon, Robert D. Purves and Gerta Vrbová 535

Absorption of amino penicillins from everted rat intestine. By Christine Dixon and Linda W. Mizen 549

Baroreflex inhibition of the human sinus node: importance of stimulus intensity, duration, and rate of pressure change. By Dwain L. Eckberg 561

Adaptation of the human carotid baroreceptor-cardiac reflex. By Dwain L. Eckberg 579

The relation between surface tension and area in the alveolar lining film. By R. E. Pattle 591

Voltage-clamp experiments on frog single skeletal muscle fibres: evidence for a tubular sodium current. By Monique Mandrino . 605

Number of glomeruli in normal and hypertrophied kidneys of mice and guinea-pigs. By J. P. Bonvalet, M. Champion, A. Courtalon, N. Farman, A. Vandewalle and F. Wanstok 627

Suppression of rat stomach histidine decarboxylase activity by histamine: H_2-receptor-mediated feed-back. By R. Håkanson, K.-I. Larsson, G. Liedberg, J. F. Rehfeld and F. Sundler . 643

The control of shivering and non-shivering thermogenesis in the rat. By Manuel Banet and Herbert Hensel 669

Temperature regulation and oxygen consumption in the developing macropod marsupial *Setonix brachyurus*. By T. T. Loh and John Shield 677

Regulation of compensatory kidney hypertrophy by its own products. By S. E. Dicker, Christine A. Morris and R. Shipolini 687

Effects of injections of calcium and EGTA into the outer segments of retinal rods of *Bufo marinus*. By J. E. Brown, J. A. Coles and L. H. Pinto 707

PAGE

Pancreatic acinar cells: localization of acetylcholine receptors and the importance of chloride and calcium for acetylcholine-evoked depolarization. By N. Iwatsuki and O. H. Petersen . 723

Pancreatic acinar cells: the acetylcholine equilibrium potential and its ionic dependency. By N. Iwatsuki and O. H. Petersen . 735

Modulation of cyclic nucleotide levels in peripheral nerve without effect on resting or compound action potentials. By John P. Horn and Donald A. McAfee 753

Transepithelial sodium transport and carbon dioxide production by the toad urinary bladder in the absence of serosal sodium. By Anthony D. Macknight and Charles W. McLaughlin . . 767

The dependence of the electrical potentials across the membrane of the frog skin upon the concentration of sodium in the mucosal solution. By Wolfram Nagel 777

The carotid chemoreceptor input to the respiratory neurones of the nucleus of tractus solitarius. By J. Lipski, R. M. McAllen and K. M. Spyer 797

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

25–26 March 1977
